## Summary

---

Engineering student with strong interest in aeronautics and mathematics. Beginner-level proficiency in Python and C but actively working towards improvement. Open to exploring topics outside of my field in order to expand my knowledge base and broaden my skill set.

Eager to build relevant experience through internships, projects, and independent studying.

## Education

---

**Cornell University**, BS in Mechanical Engineering

Aug 2023 – Present

Pursuing Minor in Aerospace Engineering

- **Relevant Coursework:** Dynamics, Linear Algebra, Python Programming
- **Expected Graduation:** May 2027

## Skills

---

**Programming** - Python, Matlab, C

*Languages I use for program implementation and mathematics computations.*

**Tools** - Fusion 360, LaTeX, VS Code

*Core parts of my workflow for modeling, documentation, and programming.*

**Soft Skills** - Communication, Teamwork, Adaptability

*I work well in coordinated groups and can take on many roles. I dedicate myself to overcoming challenges to ensure timely and efficient completion of a task.*
